PRODUCT DESCRIPTION:

Octosperse 151 is a low molecular weight functionalized maleic copolymer, and as such shows excellent effectiveness in controlling calcium carbonate. The polymer shows great stability under stressed water conditions (high electrolyte concentration) which sets it apart from present market products.

STORAGE AND HANDLING:

Containers should be kept tightly closed; avoid direct sources of heat or sunlight when possible. Make sure the part drum is used quickly and that all stock is rotated on a first-in, first-out basis. Protect from freezing. Store at 40 – 90 deg. F. Shelf life expected one year from date of manufacture provided the material is stored at proper temperatures and containers remain tightly closed.
