

# Paragum 600

Alkali Soluble Thickener

## Technical Data Sheet

**Paragum 600** is an APEO free water thin, alkali soluble cross-linked polymer dispersion from which high efficiency thickeners can be readily prepared through neutralization with an appropriate alkali such as ammonia or caustic. **Paragum 600** is used extensively as an "in-situ" thickener by adding directly to the material to be thickened. Alkaline materials will rapidly thicken as the dispersion swells. Acidic materials will rapidly thicken when the pH is raised by alkali addition.

**Paragum 600** performs effectively in a broad range of lattices: coatings, adhesives, dispersions, and solutions. Ease of handling and processing, safety, thickening efficiency, and consistency combine with its unique short 'buttery' flow characteristics to give the formulator great latitude and flexibility in product design. When used in combination with other **Paragum** thickeners, an even wider range of rheological properties can be obtained.

**Paragum 600** solution preparation: Dilute with water, then neutralize to a pH of 8.0 – 9.0 with dilute alkali. Initial dilution avoids formation of gels which can be difficult to dissolve. Solutions up to about 5 % solids can be readily prepared. More concentrated solutions may require special mixing equipment or techniques.

**Paragum 600** "in-situ" use recommendations: Dilute dispersion with an equal amount of water prior to addition to the system to be thickened.

**INCI Designation-** Acrylates Copolymer

**Paragum 600** application areas: Carpet and Rug. Upholstery. Textile and apparel. Ink and print bases. Industrial cleaners. Specialty dispersions and suspensions. Wall coverings.

**Paragum 600** is manufactured in our Dalton, GA plant using Tiarco-RST Quality Assurance process, with continual improvement as its goal. This assures batch-to-batch consistency with minimal deviation.

### SPECIFICATIONS

Appearance:	Thin, milky white solution
Solids (Microwave):	34.5 – 36.0
pH:	2.0 – 3.5
Viscosity 25C	< 250 cps

**Paragum 600** is available in drum, tote, and tanker truck quantities.

**Paragum 600** has NSF approval **EX** for use as an ingredient in Hand Care Products for food plants.
