

Stanfax 238

Lauryl Sulfate

Tiarco-RST

Rheology & Surfactant Technologies

Technical Data

Stanfax 238, ammonium lauryl sulfate, is a high quality anionic surfactant used in many personal care and industrial applications.

Manufactured to strict production tolerances, **Stanfax 238** provides formulators with day in, day out consistency, performance, and quality.

Features:

- Workhorse primary foaming surfactant.
- High output, flash foamer.
- Compatible with a broad range of anionic, non-ionic, and amphoteric surfactants.
- Detergency and foaming in low to moderate pH (5-9) applications.
- Biodegradable.
- Increased solubility and mildness as opposed to fixed alkali lauryl sulfates.
- Builds viscosity in surfactant blends.

Stanfax 238 is used in:

- Shampoos and skin cleansers as a primary surfactant.
- Delicate fabric detergents.
- Light duty liquid detergents and rug shampoos.
- Liquid hand soaps.
- Metal working and agricultural products.
- Industrial coatings applied via foaming including upholstery, bedding, and carpeting.

Stanfax 238 is manufactured at our Dalton, GA. facility using Tiarco-RST's Quality Assurance process, with continual improvement as its goal.

SPECIFICATIONS

Appearance:	Colorless/light gold liquid
Activity:	27.5 +/- 0.5 %
pH (10 % Solution):	6.75 +/- 0.25
Weight/Gallon:	8.5 lbs/gal
Unsulfated Matter (%):	1.8 max
Ammonium Chloride (%):	0.4 max
Color (Klett):	60 max
Viscosity (cps):	3000 max
	110419MO

Stanfax 238 is soluble in water, alcohol, and glycols. It is insoluble in oils and most solvents.

Stanfax 238 is available in drum, tote, and tank truck quantities.
