

# Stanfax 29

## Potassium Laurate Soap

**Stanfax 29** is an 18% active premium grade solution of potassium laurate manufactured from high quality raw materials. A natural soap, this product is used extensively as a primary foaming agent in SBR/natural latex foam rubber for such applications as padding, cushioning material, and carpet backing.

**Stanfax 29** is an outstanding foam producer, generating a fine cell structure and persistent froth. The product produces virtually no residual odor or discoloration in manufactured goods.

**Stanfax 29** is compatible with most anionic and non-ionic soaps and surfactants; natural and SBR lattices; and most additives commonly used with these lattices.

**Stanfax 29**, can be used successfully in other applications where potassium laurate is recommended.

## Tiarco-RST

### Rheology and Surfactant Technologies Technical Data

**Stanfax 29** is manufactured using Tiarco-RST's Quality Assurance process with continual improvement as its goal.

#### SPECIFICATIONS:

Appearance:	Clear liquid
Oven Solids:	20.0 ± 1.0 %
