

**PARACARE 100** is a surfactant concentrate for the personal care industry. **PARACARE 100** offers the following properties:

- High Foam
- High Viscosity
- Good Salt Response

Typical applications for **PARACARE 100** are as follows:

- Hand Soap
- Body Wash
- Bubble baths
- Shampoos
- Shower Gels
- Formulations with Little or No Salt Required for Viscosity Flexibility

**PARACARE 100** is manufactured in our Dalton, GA plant using Tiarco-RST's Quality Assurance process, with continual improvement as its goal. This assures batch-to-batch consistency with minimal deviation.

**PARACARE 100** carries the CTFA designation of: Sodium laureth sulfate, Cocamide DEA, TEA Lauryl Sulfate, Cocamidopropyl Betaine, PEG-150 Disterate.

## SPECIFICATIONS

|                 |                          |
|-----------------|--------------------------|
| Appearance:     | Clear pale yellow liquid |
| Color (Gardner) | 3 Max:                   |
| Solids:         | 40 - 43                  |
| pH              | 7- 8.5                   |
| Density:        | 8.6 lbs/gal              |
| Viscosity:      | 1000 – 6000 cps          |
